Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 8, drawn to a controller controlling a device and a method of operating a controller, classified in class 700, subclass 19.
 - II. Claim 6, drawn to a tool attachable to a controller, classified in class 700, subclass 160.
 - III. Claim 7, drawn to a system, classified in class 700, subclass 1.
 - IV. Claim 9, drawn to a method of reusing a control program, classified in class 700, subclass 86.
 - V. Claim 10, drawn to a method of controlling a correlation data stored in a controller, classified in class 708, subclass 424.
 - VI. Claim 11, drawn to a method of monitoring a devices for an abnormal condition, classified in class 700, subclass 80.
 - VII. Claim 12, drawn to a method of data processing, classified in class 700, subclass 90.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions group I to group VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions group I is related to a controller controlling a device and a method of operating a controller, group II is related to a tool

attachable to a controller, group III is related to a system, group IV is related to a method of reusing a control program, group V is related to a method of controlling a correlation data stored in a controller, group VI is related to a method of monitoring a devices for an abnormal condition, while group VII is related to a method of data processing.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-VII and vice versa, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Nishimura, Keiichi (Reg. No. 29,093) on 7/14/2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Examiner has provided a formal election/restriction requirement.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
